A USEFUL INVENTION.

Joseph W. DeCamp, an old-time Marysville miner, has invented an automatic drill holder and applied for letters of patent thereon, says the Western Mining World. The inventor claims that the device is destined to come into general use, as it will save fally 40 per cent in cost of drilling. The machine is an exceedingly simple device and can be operated by one man. For surface work it is mounted on a tripod, and for underground drilling on a stoping bar. The machine travels in rock and is held in place with a clamp. The drill does not have to be touched at all after the machine is set, and thus the necessity that now exists in hand drilling for the employment of two men is obviated, for the device, it is claimed, does the work of the drill holder in a much better manner than the most experienced driller could perform. It is so constructed with springs that the drill is given a perfect rotating motion, a feed motion and throw from the strike of the hammer. The drill is held perfectly rigid and can be set at any angle. Mr. De-Camp has been given permission to set the machine for trial in the Gagnon mine, and expects to be able to demonstrate that it will perform the work of one man in drilling.

Hiding behind a tree will be useless in the next war, according to a surgeon who has been taking notes in Cuba. The bullet from a Mauser rifle goes through a large tree with ease. It seems to be true that the bullet often passes through the human body without disabling a combatant, the wound of exit not exceeding in size that of entrance. The older firearms of the Cubans are said to be far more destructive than the modern rifles of the Spanish troops.

The Louisville Evening Post, a comie paper only equalled by the New York Evening Post, says that "the Democratic party stands for sound money, and the interlopers should not forget it." The "interlopers" are the six and a half millions of Bryan voters, and they interloped on Cleveland's pauneh and his hundred and thirty thousand Reform Club heelers. The Louisville joke is the funniest thing ever put in print, not excepting Edward Atkinson's arithmetic. -Silver Knight.

Theodore Tilton is now a bent and feeble old man. His hair is snow white. He lives just adjacent to the church of Notre Dame, in Paris, and avoids the society of his countrymen there as much as it is possible for him to do. Every day, however, he walks across the river to a little cafe near the not his unsocial hour, he will sit down frugal.

The Silver Republican leaders are organizing for aggressive work. They will put a kink in the back of the Wall street Gold Democrats, and as there are about ten times as many Silver Republicans as there are Gold Democrats, the white metal has got much the best of the bolting proposition. Friends of silver are mighty well pleased to shake off the incubus the Gold Democrats were to the cause of free silver, and they are just as well pleased to have the Free Silver Republicans join hands with them in the cause of the country and prosperity. -Star.

Some time ago I was taken sick with a cramp in the stomach, followed by diarrhoea. I took a couple of doses of Chamberlain's Colic, Cholera and Diarrhoea Remedy and was immediately relieved. I consider it the best medicine in the market for all such complaints. I have sold the remedy to others and every one who uses it speaks highly of it. J. W. STRICKLER, Valley Center, Cal. For sale by H. C. Hitchcock, druggist.

"IT WILL NOT DOWN,"

The money issue cannot be suppressed, neither side will permit it. The silver party is active, and the selfstyled sound money league is perfecting its organization with a view to continued warfare. The latter is amply supplied with funds by the bankers and money lenders, while the former the various resources of Graham relies upon the patriotism of the American people. It is a question whether the government shall be controlled by the masses or the oligarchs of wealth. The contest is not new, so far as the principle involved is concerned, but as old as we have any knowledge of human history. The oligarchs of wealth managed to control, and at last managed to destroy every popular government of ancient times, and they have not abated their efforts in modern times, and if their success has been less it is because there is more intelligence and manhood.

The goldites pretend to want more prosperity and to be working for it, but they press the measures that have produced depression and hard times that have tith incomplete the bulletin Office, Solomonwith increased energy. It is a fact of history that the selfish class will assail the price per copy will be 10 cents.

good policies with far mere vigor and persistency than the unselfish and patriotic will defend them. The test of American manhood and patriotism is being applied, and it is as severe as any that the country has been subjected to .- Mining and Metallurgical Journal.

Signs of a revival in mining are apparent on every hand, says the Western Mining World. No special mineral bearing area seems favored more than another, the renewed interest attaching to all sections from Alaska to the gulf, the Dakotas to the Pacific. We note as prima facie evidence of this fact, first, the influx of new blood and capital in the mineral bearing areas of the west; second, the marked increase in attention paid by claim and mine owners to the thorough exposition of the worth of their holdings and the immediate placing of such holdings in position for judgment on their intrinsic value by possible investors. Lastly, a general rounding-up of properties of known worth by legitimate mining promoters both at bome and abroad.
